

Donna Gandt  
RVP, Northeast  
Unanet

Donna has spent over 25 years at the intersection of business and technology in various industries, including telecommunications, software, retail, and government. Her more recent roles have included working with and serving on leadership teams from large companies to small start-ups with a focus on consulting, strategic planning, client services, web technology, and market growth. She takes tremendous pleasure in helping organizations come together to establish priorities, set performance indicators, establish systematic and repeatable processes to meet objectives, and most of all to do so through collaborative teamwork and decision making.

She is veteran herself, having served several years in the US Navy – first as a Navy Nuclear Power School Instructor, A-School Division Manager, then at the HQ office of the Office of Naval Reactors in Arlington, VA. Donna also has worked for a government contractor as head of a professional services team and with government contractors for the last 7+ years while at Unanet. Her current role at Unanet as Regional Vice President has her serving govcons across the northeast from Maryland to New England.

Donna enjoys adventure and being outdoors in just about any form – biking, hiking, skiing, camping, walking, gardening, and traveling. She has a Bachelor's degree in Mechanical Engineering from Stevens Institute of Technology and an MBA from Boston University.
